Interests & Experiences

Why are you interested in serving on a board or commission and what specific talents or expertise do you bring if appointed?

I am a fourth year CETC student and have multiple certifications in welding and automotive. This year I am in the Manufacturing Program. I would like to use my Welding skills to work for a company that focuses on water conservation.

Have you served on another board/commission in an advisory capacity? If so, please describe the board and what made serving in that capacity a good experience? What were the major concerns or issues?

I have never served on a board but I hope you give me an opportunity.

Please describe a situation where you were working with a small group and disagreed with the direction of the project, what did you do? What was the result?

I collaborate effectively with peers and am comfortable engaging in meaningful conversations with individuals of all ages. I frequently work on group projects at school, including auto repairs and welding projects, and consistently contribute to a productive and conflict-free environment.

If you were appointed, what goals would you like to see accomplished on this board or commission?

I would like to learn about our town's water conservation efforts to better serve this board. I hope to bring my insight as a youth and as a welder to help this board accomplish our goals.

Are you aware of the time commitment, and do you have the personal time to devote to this board or commission?

Yes, I'm aware of the time commitment.
