SUBJECT: SCHMIDT PROPERTY LETTER OF INTENT

To whom it may concern:

Rick Engineering Company (RICK) is pleased to submit the attached Sketch Plan Applications on behalf of TI Residential, L.L.C., the Applicant, for the proposed Schmidt Property.

The Schmidt Property proposes 119 dwelling units on 90 acres. Within the proposed 90 acres will have open space of 19.47 acres and an undeveloped mine subsidence area of 33.66 acres south of the development. The project site is located northwest of the intersection of Jay Rd and NE Countyline Rd. The adjacent zoning consists of low density residential and open space to the north and east, rural residential to the south and west. The project recently went through the process of Annexation and Zoning through the town. The existing Zoning as defined in the approved Zoning Map is open space and Low Density Residential. The project as zoned is permitted to have up to 150 single family units within the LR zone. As a part of the annexation and zoning process the project analyzed the impacts of the additional 150 units to the existing school infrastructure and fire protection services and have determined that both meet minimum standard. Will serve letters have been obtained from the electric, gas and communication providers as a part of the annexation and zoning process which assessed existing infrastructure and determined allowable service is available. The Plan has been designed to incorporate key environmental factors; including topography, geology, soils, watersheds and drainage, visual resources, and transportation. The goal of the development is to create a distinct and balanced community that integrates both the natural and built environment.

Additional improvements within the Schmidt Property consist of road improvements and utilities. Lombardi Street will continue to be constructed north east of the project from the Kenosha Farms development and connect into the intersection of Jay and Jasper Rd. Jay and Jasper Rd will have a road widening from the intersection of Lombardi and continue until the intersection of NE Countyline Rd. Water and sewer services will be supplied by the Town of Erie and connect to the adjacent developments of Kenosha Farms and Lost Creek Farms. The project is proposing to connect water and sewer to the Lost Creek Farms Subdivision understanding that the development is not currently in place. Based on discussions with the Town its our understanding that these facilities will be in place prior to construction. If there is a case where water and sewer is not available provisions will be made to make water and sewer connections to the existing water and sewer systems to the north of the property.

The site generally slopes from the south to the north. The Lower Boulder Ditch traverses the site in the east, west direction and bisects the open space and Low Density Residential Zoning districts. This ditch requires a 75' buffer along the southern edge of the ditch which we have provided an allowance for in the site layout. Drainage will be collected in a storm drain network and drain into a single detention basin located on the northern edge of the site just south of the Lower Boulder Ditch.

A ditch crossing will be proposed consisting of either a siphon or pump system. The outlet will be to the regional ditch located on the north edge of the property.

The site is encumbered by a 30' trail easement along the eastern edge of the property which currently allows public access use of the existing trail. This project proposes to maintain the trail and incorporate it into the site amenities. A 0.8 acre park has been proposed which will be maintained by the HOA or district, which abuts the trail to provide connectivity to residents of the proposed development as well as other residents in adjacent developments that utilize the trail.

The project will be constructed in one phase. The site does rely on the adjacent property titled Lost Creek Farms for secondary road access. It's our understanding from discussions with Town staff that construction is underway however if for some reason construction halts a temporary access through the Lost Creek Farm Subdivision is proposed.

A portion of the site has been determined undevelopable and is defined as the property south of the 0% Strain Line. A significant amount of analysis has been performed by Western Environmental and Ecology to review and assess the existence of an old mine located below the property. Due to the possibility of mine subsidence which has occurred in the past in the area south of the strain line we are currently proposing to leave the site as is currently shown today.

There are gas and oil wells located on the site and on the adjacent site to the east. We have located these facilities and have provided adequate setbacks as allowed by the Town Code and Approved annexation agreement.

If you have any questions regarding the documents provided with this application, please contact us at 303-537-8020.

Sincerely,

Troy Bales, P.E.
