Mr. Chris Larue, Senior Planner

**The Town of Erie**

645 Holbrook St. P.O. Box 750 Erie, CO 80516

RE: SK-000997-2018: Erie Village Filing 5 Sketch Plan II - Revised Narrative

Mr. Larue:

Erie Village Plan II – has been revised in response to the Town of Erie comments, and to create a more livable and sustainable mixed-use plan.

a. General project concept and purpose of the request.

The owner of the property, Porchfront Homes – Erie Village LLC is prepared to move forward with a PD amendment and replat of its property within Erie Village Filing No. 5, in order to amend the senior assisted living facility plan to a mixed-use neighborhood plan as originally envisioned for Erie Village. The PD amendment provides for a mixed-use neighborhood with a broader range of housing, office and retail choices than the current Filing 5 PD.

The live-work units contemplated in Sketch Plan I have been removed to clarify the residential uses and parking requirements. The condominium units have also been removed and Sketch Plan II focuses on townhomes and single family detached (SFD) homes. The single-family residential homes and townhomes are within walking distance of the commercial - arrayed on the arcing roadway and pedestrian walkway system paralleling C.W. Bixler Boulevard. The detached single-family homes are located on the two blocks closest to C.W. Bixler Boulevard across from the existing single-family detached and duplex residential. The townhomes are located on the inner tier around an elliptical shaped common open space. The single-family homes and townhome are all accessed off of alleys with principal house entrances located on primary streets, significant landscaped areas and/or a linear landscape court.

The commercial is located in an area at the northeast corner of County Line Road and C.W. Bixler Boulevard to provide for localized office and commercial services. The commercial incorporates the existing office building and adds two new buildings for office; limited food, beverage and retail businesses. The commercial is accessed from C.W. Bixler Boulevard by way of the existing local road across from Tyler and a drive at the roundabout on C.W Bixler Boulevard. The parking area has a strong pedestrian emphasis with a perimeter walkway that all of the commercial facilities to the adjoining residential and open space areas. The businesses will be housed in two-story buildings that are compatible with the existing commercial building and reflect the traditional, Victorian architectural character of Erie Village.

b. Total land area to be subdivided.

14.82 acres including Outlot X, south of C.W. Bixler Boulevard.

c. The total number of lots, density, standards.

Total number of dwelling units - 70 homes; 4.7 du/ac

- 32 Single-family detached homes
  - Lot: 5,000sf minimum
  - Setbacks: 12' front, 12' street, 5' side, 20' rear garage
- 38 Townhomes: Lot - 2000 sf minimum lot size
  - Lot: 2,000sf minimum
  - Setbacks: 12' front, 12' street, 0' side, 20' rear garage

- d. Commercial - total square footage of floor area proposed.  
40,000sf commercial (.44 FAR commercial)  
Projected Commercial Mix:
- 30,000sf office (10,000sf existing, 20,000sf new)
  - 7,000sf retail (new)
  - 3,000sf food & beverage (new)
- e. The total land area to be preserved as open space.  
Total open space: 3.32 acres
- f. Subdivision phasing.  
The first phases of the subdivision are projected to begin with the single family residential along C.W. Bixler Blvd. and the new commercial building at the corner of C.W. Bixler Blvd and County Line Road. The townhomes would begin in the 2<sup>nd</sup> phase progressing south from the commercial area along County Line Road.
- g. Existing Infrastructure and Services  
There is water, sanitary sewer and storm drainage facilities adjacent the property. St. Vrain Valley School District, Mountain View Fire Rescue, Excel Energy (electric power and gas) are currently serving the planned community adjacent the property.
- h. Public & Private Amenities  
Approximately 2.1 acres is allocated to landscaped common areas and open space to be maintained by the Home Owner Association. These areas include the ellipse common area, landscape court and Outlot X landscaped area. In addition, the buffer and drainage area along County Line Road accounts for an additional 1.6 acres of landscaped open space. The ellipse is planned as an open space amenity in the heart of the Townhomes – providing a gathering and circulation area. A landscaped open space is also planned across from the Village south of C.W. Bixler Boulevard on Outlot X. Trail and sidewalks will connect with existing parks and community Spine Trail.
- i. Existing or Proposed Covenants & Restrictions  
The property will remain in the existing Homeowner's Association and adhere to those CC&R's. There is a covenant recorded against the property by separate instrument concurrently with the existing plat - restricting the use and occupancy of dwelling units (2 people/unit). This covenant would need to be repealed as part of the PD Amendment and replat of the property.

We look forward to working with you on this project and request that the Filing 5 Sketch Plan II as revised be scheduled for review with the Town Board of Trustees.

Thank you.

## Planning Comments for the Erie Village Filing No. 5 Sketch Plan:

### General Comments & Responses

1. Request would be to amend the plat and PD from an age restricted continuum of care retirement community to a residential and commercial mixed use village. The following land use applications will be required:
  - a. Erie Village PD Amendment
  - b. Preliminary Plat
  - c. Site Plan
  - d. Final Plat
  - e. Removal of the restrictive covenant
  - Response: Noted – the applicant would request an amendment to the plat from age restricted retirement community care to a residential/commercial mixed-use village with the appropriate applications as identified.

# Bestall Collaborative Limited

Planning Environment Construction Management Development

2. The site is designated Mixed Use (MU) per the Town of Erie Comprehensive Plan. Mixed Use is defined under the UDC per section 10.11.3 as the following:

The development of a lot, tract or parcel of land, building or structure with 2 or more different uses including, but not limited to, residential, office, retail, public uses, personal service or entertainment uses, designed, planned and constructed as a unit.

  - a. The submitted application meets the definition of MU per the above definition, as it contains both residential and commercial land uses.
    - Response: Noted.
3. Site is zoned Planned Development (PD) and is within the Erie Village Planned Development, Fifth Amendment which was intended to allow mixed use office, commercial, and residential uses associated with a retirement community. The PD restricts the occupancy of residential uses within Filing 5 to 2 people, one of which must be at least 62 years old. Types of allowed residential uses within the PD include single-family homes, duplexes, and multi-family buildings. Types of allowed uses associated the retirement facility include assisted living and adult day care. Types of allowed commercial uses within the PD include dental or medical offices, bars/taverns and restaurants, business or professional offices, and general retail and personal service stores.
  - a. Please determine whether or not the proposed sketch plan development would meet any unit cap or restrictions currently in place for the PD.
    - Response: The Sketch Plan as submitted would not meet any unit cap. The proposed plan reduces the approved number of residential units from 189 to 70; and the gross density from 11/ac to 4.7/ac.
  - b. Please contact our Economic Development coordinator (Ben Pratt) and discuss the viability of the proposed commercial uses.
    - Response: A phone conference was held with Ben Pratt - Economic Development coordinator. Mr. Pratt was generally positive about the office and retail potential at the Village Core and how a properly scaled (as currently planned) project can contribute to the overall economic development of the Town of Erie as a viable commercial node with an emphasis of services for local residents.
4. In addition to the PD restrictions, there is a covenant recorded against the property with the existing plat which imposes the following restrictions (among others) on the property:
  - a. The maximum number of people occupying a dwelling unit shall be 2 people.
  - b. At least one person occupying a dwelling unit shall be 62 years of age or older (considered a "Qualified Occupant").
  - c. The restrictive covenant shall not terminate nor shall it be amended without the prior written approval of the Town of Erie Board of Trustees.
    - Response: Noted - as proposed the applicant will request the Town Board to terminate the covenant.
5. No detention or drainage areas were designated. A preliminary drainage study was not included with the documentation. A drainage analysis will be required with the preliminary plat.
  - Response: Noted - a drainage analysis will be provided at the time of preliminary plat submittal.
6. A traffic study will be required with the future submittals to determine the classification of the streets and whether or not direct access from lots will be allowed onto C.W. Bixler Boulevard.
  - Response: The plan has been revised and there is no longer direct access from residential lots on to C.W. Bixler Boulevard.

# Bestall Collaborative Limited

Planning Environment Construction Management Development

7. A parking analysis will be required with the future submittals. This will be important to determine the number of parking spaces for the condos and commercial area. Parking requirements are listed in Table 6.6.1 of the UDC. Off street parking shall be provided in addition to parking requirement for residential use. Provide more details regarding parking concerning the townhomes and condos.
  - a. Provide more details about the underground parking concept. How many spaces are anticipated to be located underground?
    - Response: Noted – a parking analysis will be required with future submittals. Sketch Plan II as revised contains no underground parking spaces.
  
8. Please review the Town's Standards and Specifications regarding road rights-of-way. PD 5<sup>th</sup> amendment created a new private street standard specifically for the proposed age restricted facility that consisted of 42 feet of right-of-way which includes 32 feet of paving and 5-foot attached sidewalks. The attached sidewalks were allowed given the unique nature of the age restricted community. The sidewalks along CW Bixler Boulevard were required to be detached 5 foot walks with a 5.5 foot tree lawn consistent with the overall Erie Village PD. The UDC normally would require all sidewalks to be detached and be separated by a tree lawn a minimum of 8 feet in depth. The existing commercial building within Filling 5 has detached walks contiguous to it. The new design for this filing should incorporate detached sidewalks and tree lawns consistent with current Town standards.
  - a. Please amend the sketch plan with respect to this comment. Roads should utilize Town standards.
    - Response: Sketch Plan II has been revised and utilizes Town standards.
  
  - b. Areas that are designated as public right-of-way should not be within tracts.
    - Response: Sketch Plan II as revised - separates public right-of-way from tracts.
  
  - c. Please review the Town's Standards and Specifications regarding road right- of-ways. The new design for this filing should incorporate detached sidewalks and tree lawns consistent with current Town standards and specifications.
    - Response: Sketch Plan II as revised incorporates detached sidewalks and tree lawns consistent with Town standards and specifications.
  
  - d. Staff has several concerns regarding access as follows:
    - i. The design of the access to the commercial properties needs to be redesigned. Currently, the design allows access to the commercial pads through the local streets that are primarily used for residential. A better access would be from C.W. Bixler Blvd in front of the roundabout.
      - Response: Sketch Plan II as revised –provides an access to the commercial area at the roundabout on C.W. Bixler Boulevard and the local road across from Tyler. This roadway currently serves the existing commercial building.
  
    - ii. A connectivity analysis/plan should be completed. There should be more understanding of how this site will flow.
      1. All of the internal circular streets dead end at the sidewalk along County Line Road which is not acceptable.
        - Response: A Connectivity Analysis is provided on Sheet 3 of the Sketch Plan submittal – indicating pedestrian and vehicular circulation. The Sketch Plan II street system has been revised to provide alley access for all residential units, continuous looping and limiting dead end conditions.

9. Utilities were not addressed in the submittal. This will need to be addressed in future submittals. Please note, there is an existing 24-inch storm main that runs through the middle of the property that would require relocation.
- Response: Noted – utilities will be addressed in future submittals.
10. Greater detail shall be provided regarding the condo and townhome areas and designs. Please review Section 10.6.7.F of the UDC. Please provide an overall concept for both the townhome and condo products. Requirements to keep in mind include:
- Response: Condominium units have been removed from the plan. Elevations have been provided for the townhome and single family residential.
- a. The maximum length of any multi-family building shall be 156 feet. The condo massing is difficult to determine and appears to be one building.
- Response: Noted – the maximum length of a townhome building in Sketch Plan II is approximately 147'6".
- b. The primary entrance and facade of individual buildings within a multi-family development shall be oriented towards: (1) Primary internal or perimeter streets, or (2) Common open space, such as interior courtyards, parks, or on-site natural areas or features with a clearly defined and easily accessible pedestrian circulation system.
- Response: Noted - the principal entrance and façade of the townhomes are oriented towards the primary internal street: County Line Road landscape buffer; and a common open space (linear landscape courtyard) providing pedestrian circulation and enhanced neighborhood character.
- c. Primary entrances and facades shall not be oriented towards alleys, parking lots, garages, or carports. Many of the townhomes near the commercial development face a parking area.
- Response: Sketch Plan II has been revised, and principal entries for thirty (30) of the thirty-eight (38) townhomes - 79%, face on to landscaped open space areas. Principal entries of the remaining eight (8) townhomes face onto treelawn sidewalk adjoining a driveway (slow moving vehicles) serving the townhomes and commercial area. The townhomes have front yards of approximately 20'; a sidewalk/treelawn 10.5'; and additional landscape area of 14.5' creating a rich landscape setting between the townhomes and commercial buildings and parking. Four (4) townhomes are 100' from the nearest commercial building and 45' to the nearest parking lane on which parking is oriented away from the townhomes. Four (4) townhomes are 190' from a commercial building and 45' from the nearest parallel parking.
- This type of smart/compact development pattern allows for a walkable interface between the residential and commercial which is highly desirable to homeowners. 85% of the commercial area is planned for office which has proven to be a good neighbor to residential, with office activity diminishing when residents are home – evenings and weekends. The character and land use relationships of Sketch Plan II are reminiscent of traditional 'mainstreets' – like Old Town Erie; and distinguishable contemporary villages (Seaside, FL; Carmel, CA; Aspen, CO) which rely on similar residential and commercial relationships to activate retail and provide attractive, livable settings.

Planning Environment Construction Management Development

11. Dimensions, lot sizes or compliance/ability to meet building setback requirements are not discussed within the sketch plan application. The PD amendment will need to address this concern.
  - Response: Noted.
    - SFD lot size (5,000sf) and widths (50' minimum) are compliant.
    - SFD setbacks (12' front, 12' street, 5' side, 20' rear garage) will be addressed as part of the PD amendment.
    - Townhome setbacks (12' front, 12' street, 0' side, 20' alley garage) are compliant
    - Townhome lot size (2,000sf minimum) will be addressed as part of the PD amendment.
  
12. Building heights are not addressed within the sketch plan. This will also need to be addressed in the future land use applications. Maximum building heights are currently limited to 35 feet.
  - Response: Noted, the SFD homes are compliant with Town Standards at a maximum of 35' in height. The townhomes are non-compliant than the Town standard in height - 43'6" maximum, to be addressed in the PD amendment.
  
13. Please provide more information about the proposed commercial buildings.
  - a. There are concerns with the parking area and possible conflicts with the townhomes.
    - Response: Sketch Plan II has been revised to indicate the treelawn, drive lane and landscape area between the commercial and townhomes (45' setback). This distance is greater than the currently approved PD and does not represent a land use conflict in a mixed-use community.
  
  - b. Please describe how the commercial plaza is envisioned. It appears to just be a parking lot for the commercial area on the sketch plan.
    - Response: The commercial 'plaza' label has been removed. The parking area has been planned for pedestrian access, movement and safety; with a sidewalk connecting around the perimeter - connecting to the open space system and sidewalks in the village and Town of Erie.
  
14. What are the preliminary plans for waste collection?
  - a. With the proposed density you might consider central dumpster locations, rather than individual roll off trash cans.
    - Response: The commercial area will have central dumpster locations identified in the PD submittal. At the density of the revised plan, Individual trash containers are sufficient for the residential homeowners. The revised plan has 70 residential homes - thirty-two (32) SFD homes and thirty-eight (38) townhomes with garages - a gross density of 4.7 units/acre.

## Parks and Open Space

15. A conceptual open space and conceptual developed park plan was not submitted with the submittal. More details about the common open space should be provided. Specifically, a pocket park would likely be required with this development in order to meet the needs of the development without overloading existing infrastructure.
  - Response: The pocket park and open space requirements have been met for Filing 5, which is located within a ¼ mile of two existing pocket parks. Sketch Plan II as revised, provides contiguous open space in the ellipse common area and Outlot X south of C.W. Bixler Boulevard.

# Bestall Collaborative Limited

Planning Environment Construction Management Development

- a. You should also look at possibly putting in improvement in to the existing park to the west. This could offset the potential impacts from this development.
  - Response: A major mixed-use development was originally planned and approved for Filing 5 and the park requirement was met at that time.

Potential impacts to trails and parks of future homeowners as proposed in reduced commercial and residential scale of the Erie Village II plan will be negligible. The homeowners will provide additional revenue in the form of Town & HOA fees and taxes to maintain and enhance the existing parks.
16. Appropriate neighborhood park and community park fees in-lieu shall be required per Section 10.6.3 of the UDC.
  - a. Fees in the amount of \$236,564 per acre are charged of required dedication for Neighborhood Parks.
    - Response: Park requirements were previously met for Filing 5.
  - b. Fees in the amount of \$3,889 are charged per building permit for Community Parks.
    - Response: Noted.
17. The Town will likely require an HOA to take on the maintenance responsibility for the landscape buffer and drainage areas.
  - Response: Noted.
18. Based on calculations with the previous developments the open space requirements have been met.
  - Response: Noted.
19. Future plan submittals should illustrate how parks and trails connections are being made to the existing infrastructure.
  - Response: The revised plan utilizes a landscape court and treelawn sidewalk system for pedestrian connections to the existing, surrounding sidewalk and trail system, including a trail connection through the Outlot X on the south side of C.W. Bixler Boulevard to the Spine Trail.
20. A spine trail connection shall be established from County Line Road to the existing spine trail to the west. The trail should go through Outlot X and Town open space.
  - a. The sketch plan recognizes this opportunity but does not detail the connection.
    - Response: Noted - a spine trail connection shall be established from County Line Road to the existing spine trail to the west through Outlot X and Town open space. The connection will be detailed in the PD submittal.

## County Line Road:

21. County Line Road is considered a community gateway per section 10.6.2.D of the UDC. As part of a community gateway the following additional standards shall apply to protect this distinct entryway into the community:
  - a. A minimum 30-foot landscaped buffer shall be maintained on either side of the street. This buffer should utilize a variety of live plant material and berming to provide year-round visual interest. A minimum 8 foot wide sidewalk shall be incorporated as an integral component of the landscape buffer and landscape area within the right-of-way.
    - Response: The plan as submitted recognizes and complies with the County Line Road community gateway standards.
