Exhibit A Scope of Services

Contractor shall monitor all variables and pollutants, with the same real-time data reporting that was implemented at the beginning of the program in the summer of 2021. Contractor shall monitor ozone and Particulate Matter ("PM") following 'regulatory-like' protocols. This entails following the instrument configuration, calibration, and maintenance protocols as mandated by the Environmental Protection Agency, and followed by the Colorado Department of Public Health and Environment ("CDPHE").

Contractor shall monitor volatile organic compounds ("VOCs"), which relies on operation of a gas chromatography-flame ionization instrument. This provides sensitive and VOC-specific monitoring of a series of the primary oil and natural gas hydrocarbons. The most prominent VOCs observed in ambient air, with a minimum of twenty-five individual species, shall be reported. Quantification of VOCs shall follow the protocol and be based on the calibration scale the World Meteorological Organization Global Atmospheric Watch program with calibration standards to be obtained from the U.K. National Physics Laboratory.

Contractor shall include the automated processing and reporting of the data to the dedicated Erie web portal (<https://www.bouldair.com/erie.htm>). In addition, data from the Erie monitoring shall be included in the AirLive Combined Northern Colorado Front Range website (<https://www.bouldair.com/NoCoFrontRange.htm>). All historical data can be viewed and analyzed at the Boulder AIR Interactive Data Analysis Tool (<https://bouldairtools.com/interactive/>). Site access, electrical power, and internet communication shall be provided by the Town at no cost to Contractor.
