Legal Description: **See attached full legal description.**

Zoning: Planned Development

Current Use: Golf Course Clubhouse

Process: Special Review Use and Site Plan Review

Planner: Hannah Hippely / Senior Planner

Request: Installation of a new telecommunications facility including rooftop mounted antennas and associated ground equipment.

Project Description: Construction of a new rooftop cupola to a maximum height of 42' designed to match architecture, texture and color of existing building which will conceal twelve (12) new panel antennas and twelve (12) new remote radio head (RRH) units and associated surge suppression equipment and cabling. Also, the installation of equipment cabinets on a concrete slab-on-grade at ground level entirely screened by wood wall with lap siding in light brown hue to match building.

Written Narrative

a. General project concept and purpose of the request:

Verizon Wireless provides best in class wireless service to its customers and others using its network. To do so, it is continuously testing, improving, and expanding its infrastructure; and because of the exponential growth in data usage (such as for downloading business files and emails from company networks, streaming music and videos, movies, and sportscasts, and other such uses), Verizon Wireless must constantly add more communications facilities to address capacity issues created by ever-increasing data usage.

Verizon Wireless has identified a need to enhance service in Erie, Colorado particularly in the vicinity of the Vista Ridge development because of the rapidly expanding population and demand for digital services. The demand from residents, businesses and travelers to have uninterrupted internet connectivity at all times continues to create greater and greater demands on the existing cellular facilities. Many residences have foregone traditional landlines and have, not only a wireless telephone, but often multiple wireless devices that access the network. Tablets, laptops, computers and security systems, not to mention other household smart technology appliances, now have or require internet connectivity capabilities for diagnostics such as refrigerators, air conditioners, furnaces, just to mention a few of the demands.

The provision of personal wireless services are only possible through the installation of numerous overlapping and interconnected wireless facilities that, when combined, create a wireless network, which then serve individuals, businesses, and emergency services providers. Facilities are comprised of radio antennas together with other necessary electronic equipment that receive and transmit low-power radio signals to and from mobile wireless handsets, thereby facilitating wireless communications. Each wireless facility services a specific geographic area, the exact radius of which is dependent upon the details of corresponding “hand-off” sites.

Given that Verizon Wireless’ digital technology operates at extremely low power, it is critical that key network sites, like this one, be maintained at precise locations and height. This site will become critical to the Verizon Wireless network and will handle a significant amount of call traffic every day given the proximity of the nearby residential districts and thoroughfares.

The significance of providing adequate wireless and data service (i.e., coverage and capacity) is important considering the increased reliance on mobile devices for access to emergency services. Many emergency personnel and first responders rely upon wireless networks not only for secure encrypted wireless communications, but also for use of mobile equipment that has become fairly commonplace in emergency vehicles and for the transmission of data services.

In order for this networked system to function without coverage or capacity “gaps”, there must be facilities that are properly located, installed and operational. If there are gaps in coverage or capacity between facilities, Verizon Wireless customers or other users who travel into the area will experience an unacceptable level of service, including failed attempts, busy signals, dropped calls, and inability to access or download data (i.e. emails, maps, etc.).

Generally, the siting of facilities is fairly inflexible, as in any given search area there will be a limited number of feasible locations from which a wireless facility is capable of providing adequate service to the target area.

In order to accommodate the newest technologies and the newer high-speed data requirements that the public is demanding, Verizon Wireless must construct a wireless facility in this area to fill a gap in network coverage for voice and data demands. This facility is the least obtrusive design proposed as a disguised cupola architecturally integrated on the rooftop of the clubhouse at the Vista Ridge Golf Course. The concealed antenna arrays will be located within the proposed cupola and not visible to the public. Base station cabinets for the necessary electronics will be housed on a slab-on-grade adjacent to the existing building structure with restricted access to the facility and screened with an enclosure. The structure will be finished with siding, trim and paint colors to match the clubhouse building. Access to the equipment area will be restricted to authorized personnel only.

b. How the proposed development is in compliance with the five approval criteria of the Municipal Code Title 10 –UDC for Site Plan Review:

- a. The Site Plan is generally consistent with the Town's Comprehensive Master Plan;
The provisioning of wireless telecommunication services for the town's residents, businesses and visitors satisfies the needs of a growing residential population as well as provides enhancements to the speed and accuracy emergency services – such 911 calls.
- b. The Site Plan is generally consistent with any previously approved subdivision plat, planned development, or any other precedent plan or land use approval as applicable;
This property is zoned PD (Planned Development) and is subject to the Vista Ridge Development Plan which does not specifically address telecommunication facilities.
- c. The Site Plan complies with all applicable development and design standards set forth in this UDC, including but not limited to the provisions in Chapter 2, Chapter 3, Chapter 4, and Chapter 6;
Please see attached Erie UDC Telecommunication Facilities Discussion for details of compliance as it relates to Telecommunication Facilities in Erie.
- d. Any significant adverse impacts reasonably anticipated to result from the use will be mitigated or offset to the maximum extent reasonably practicable; and
No significant adverse impacts are anticipated from the proposed telecommunications facility. The antennas will be completely concealed within a rooftop cupola designed to match the existing building's architecture, materials and paint colors. The ground equipment will be camouflaged as well as secured and restricted to authorized personnel only. The facility is unmanned and 1-2 technicians will conduct routine maintenance monthly for approximately 1 hour with no disruptions to the existing land use or surrounding community.
- e. The development proposed on the Site Plan and its general location is or will be compatible with the character of surrounding land uses.
The proposed telecommunications facility will be fully integrated into the existing architecture and completely concealed from the general public as well as the clubhouse guests and customers.

c. How the proposed building architecture provides visual interest consistent with the community's identity, character and scale. How building facades and rooflines are articulated to reduce the mass, scale, uniform and monolithic appearances of large buildings. How architectural features, patterns and details provide visual interest at the scale of the pedestrian;

The proposed wireless communications facility will cause little or no visual impact as the facility is designed as a disguised telecommunications structure that will be finished to match the existing

clubhouse materials and paint colors. The proposed lease area of 155 sq. ft. is the minimum necessary to support the operations of this telecommunications facility. There will be no visual impact to a pedestrian walking past or to a driver in a vehicle on the adjacent road.

d. Development schedule indicating the approximate date when construction of the proposed development, and when applicable, phases of the proposed development can be expected to begin and be completed;

All permits necessary from the Town of Erie for the new facility shall be obtained prior to any construction. These permits will be applied for immediately following the approvals of the Site Plan Review and Special Review Use.

The proposed project would entail approximately two weeks of construction time, weather permitting. The rooftop cupola unit would be constructed off-site and set up using a crane. The aerial work would be completed concurrently with the ground equipment enclosure including concrete pad. Placement of the cabinets, testing, electrical, etc. will be completed all in a single phase within the two-week construction timeframe.

This will be an unmanned facility once construction is completed requiring no water or sewer provisions. Routine maintenance shall occur monthly with 1-2 technicians visiting the site for approximately one hour each visit. No additional parking accommodations are required as vehicles used by the technicians are typically pick-up trucks or SUVs.

This facility will comply with all FCC rules governing construction requirements, technical standards, interference protection, emissions, power and height limitations and radios frequency standards as well as FAA rules of location and operation.

e. Provide general business related data including the total number of employees, the square footage of building(s), lot area, and total project value (building and site development costs excluding land value);

The proposed facility is unmanned and does not have any employees. The square footage of the proposed facility is 155 sq. ft. and the total area of the underlying property (Tract 15) is 211,911 sq. ft. The estimated project value will be determined after all alterations are made to the site plan for the purposes of approval.

f. If residential units are proposed, the number of units and how they are being integrated into the proposed development;

Not applicable – no residential units are proposed.

g. A brief description regarding the location, function and ownership/maintenance of public and private open space, parks, trails, common areas, common buildings; and

Not applicable.

h. A brief description regarding the status of mineral rights and the substance of any existing or proposed covenants, special conditions, grants of easements, or other restrictions applying to the proposed subdivision.

Not applicable – no subdivision is being proposed.

Summary

The Verizon Wireless proposal shall comply with all standards and requirements in the Vista Ridge Development Plan. E911 services and public safety will all benefit from the additional technologies requested for this site by enhancing speed and accuracy in locating 911 calls.

The integrity of the Verizon Wireless network will rely on this site and this site shall comply with the intent of the Town's Unified Development Code. The proposed construction will cause minimal visual or other negative impacts on the area while at the same time, offer the residents, home businesses, and traveling public with better and faster voice and data technologies, and better security.

- Full disclosure Verizon is building a 4G LTE site, which means voice calls will be carried over our LTE network. THIS IS A CHANGE AND WILL REQUIRE CUSTOMERS TO HAVE A DEVICE CAPABLE OF ADVANCED CALLING.

What is a 4G LTE site?

A Verizon 4G LTE cell site uses the latest technology to carry both voice and data. Voice service is provided over VoLTE or Voice Over Long Term Evolution technology through a service Verizon calls Advanced Calling 1.0.

Advanced Calling offers high-definition or HD voice and video calling. To complete calls on this new cell site, customers' phones must be capable of Advanced Calling and that feature must be activated in the phone itself. Both customers on a call must be served by 4G LTE and have the Advanced Calling feature activated to experience HD voice and video service.

Customers with older 1X, 3G or 4G devices without Advanced Calling will not experience a change in voice service.

Thank you for your time and consideration in this matter.

Chapter 2: Zoning Districts

Section 10.2.2 Residential Districts

A. General Purposes of Residential Districts

#8. Facilitate the provision of services, such as utilities, telecommunications technology, and streets and roads to accommodate planned population densities;

The proposed facility lies within a densely populated residential development on an existing golf course facility clubhouse. This location has been identified as being underserved by the Verizon Wireless network. Expansion of the network in this area will provide more reliable and faster voice and data connectivity to the community's residents, businesses and travelers.

Chapter 3: Use Regulations

Per the use table below, telecommunication facilities are subject to Special Review Use for all zoning districts.

Section 10.1.1 Table of Permitted Uses

Chapter 3: Use Regulations
Section 10.3.1 Table of Permitted Uses

Section 10.3.2 Use-Specific Standards

2. Telecommunication Facilities

- a. ***Concealed Antennae within Freestanding Towers*** Concealed antennae within freestanding towers shall comply with height and setback requirements set forth in Subsections 3.2.B.2.b and 3.2.B.2.c below and shall be compatible with the character of the surrounding area as determined by the Community Development Director based on surrounding land uses or zoning, vegetation and other considerations deemed appropriate by the Community Development Director.

Not Applicable – this is a fully concealed telecommunication facility.

- b. ***Concealed Building Mounted Antennae or Tower*** If a concealed antennae or tower is placed on a building it shall be in scale with the building upon which it is placed. The antennae or tower shall be fully concealed within an element of the building that is designed to be of the same or similar materials and colors as the structure it is located on. The element that conceals the antennae or tower shall be in scale with the building and shall not look like an add-on that is not integrated with the building.

This facility is the least obtrusive design proposed as a disguised cupola architecturally integrated on the rooftop of the clubhouse at the Vista Ridge Golf Course. The concealed antenna arrays will be located within the proposed cupola and not visible to the public. Base station cabinets for the necessary electronics will be housed on a slab-on-grade adjacent to the existing building structure with restricted access to the facility and screened with an enclosure. The structure will be finished with siding, trim and paint colors to match the clubhouse building. Access to the equipment area will be restricted to authorized personnel only.

- c. ***Non-Concealed Building-Mounted Antennae and Towers*** Non-concealed, building-mounted antennae and towers may not exceed 40 percent of the height of the building on which they are located. Height for a building-mounted antennae and towers shall be measured from the grade of the building to the highest point on the tower structure, including any installed antennae and lighting and supporting structures. Building-mounted antennae and tower structures shall not exceed the height limits set forth in Section 2.7.

Not Applicable – this is a fully concealed telecommunication facility.

- d. ***Non-Concealed Freestanding Towers*** Regardless of location, all non-concealed, freestanding towers shall comply with the standards of

Town of Erie, Colorado
Unified Development Code (August 2015)
Telecommunication Facilities Discussion / SRU-000828-2016 & SP-000829-2016

this Section.

Not Applicable – this is a fully concealed telecommunication facility.

e. Outside Experts and Disputes

- i. Siting of telecommunications facilities may involve complex technical issues that require review and input by unbiased outside experts. The Town may require the applicant to pay the reasonable costs of a third-party technical study of a proposed facility. Selection of expert(s) to review the proposal shall be at the sole discretion of the decision-making body.

The siting of this proposed telecommunications facility is supported by RF propagation maps. Verizon Wireless may provide these maps upon request.

- ii. If an applicant for a telecommunications facility claims that 1 or more standards of this UDC are generally inconsistent with federal law as applied to a particular property, or would prohibit the effective provision of wireless communications within the relevant market area, the decision-making body may require that the application be reviewed by a qualified engineer for a determination of the accuracy of such claims. Any costs for this review shall be charged to the applicant.

- f. **Abandoned Antennas or Tower Structures** Any antenna or tower structure that is not operated for a continuous period of 12 months shall be considered abandoned, and the owner of such antenna or tower structure shall remove the same within 180 days of receipt of notice from the administrative official notifying the owner of such abandonment. Failure to remove an abandoned antenna or tower structure within said 180 days shall be grounds for the Town to remove the tower structure or antenna at the owner's expense. If there are 2 or more users of a single tower structure, then this provision shall not become effective until all users cease using the tower structure.

Verizon Wireless shall meet or exceed removal requirements for facilities not in use or abandoned.

Chapter 11: definitions

Section 10.11.13 Terms Defined

Concealed Antennae and Towers

Any man-made trees, clock towers, bell steeples, light poles, water towers and similar alternative design mounting structures that camouflage or conceal the presence of antennas or towers.

The proposed antenna facility meets the definition of concealed as it is an architecturally integrated rooftop cupola designed to match the existing structure's materials and paint colors.

Telecommunication Facilities

Telecommunications facilities transmit analog or digital voice or communications information between or among points using electromagnetic signals via antennas, microwave dishes, and similar structures. Supporting equipment includes buildings, shelters, cabinets, towers, electrical equipment, parking areas, and other accessory development. Specific use types include: **Antenna Collocation of Existing Tower; Concealed Antennae and Towers; Non-Concealed Building-Mounted Antennae and Towers; or Non-Concealed Freestanding Towers.**

The proposed telecommunication facility consists of antennas concealed behind a rooftop cupola and associated ground equipment located adjacent to the clubhouse's service area. This area will be enclosed with siding, trim and paint colors to match the clubhouse building. Access to the equipment area will be secure and restricted to authorized personnel only.

Lease Area/Access & Utility Easements

LEASE AREA
BEING A TELECOMMUNICATION LEASE PARCEL LYING WITHIN A PORTION OF TRACT 15, VISTA RIDGE MASTER FINAL PLAT RECORDED NOVEMBER 28, 2001 AT RECEPTION NO. 2903870, TOWN OF ERIE, COUNTY OF WELD, STATE OF COLORADO, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID TRACT 15; THENCE ALONG THE NORTH LINE OF SAID TRACT, S67°31'52"E, 223.39 FEET; THENCE S55°03'35"W, 132.72 FEET TO THE POINT OF BEGINNING; THENCE S25°19'27"W, 8.50 FEET TO A POINT HEREINAFTER REFERRED TO AS POINT "A"; THENCE CONTINUING S25°19'27"W, 2.50 FEET; THENCE N64°40'33"W, 16.26 FEET; THENCE N25°19'27"E, 5.50 FEET; THENCE N64°40'33"W, 0.74 FEET; THENCE N25°19'27"E, 6.50 FEET; THENCE S64°40'33"E, 9.60 FEET TO A POINT HEREINAFTER REFERRED TO AS POINT "B"; THENCE CONTINUING S64°40'33"E, 7.40 FEET TO THE POINT OF BEGINNING.

CONTAINING 200 SQ. FT. OR 0.005 ACRES MORE OR LESS.

5' ACCESS EASEMENT

BEING A STRIP OF LAND 5.00 FEET IN WIDTH LYING WITHIN A PORTION OF TRACT 15, VISTA RIDGE MASTER FINAL PLAT RECORDED NOVEMBER 28, 2001 AT RECEPTION NO. 2903870, TOWN OF ERIE, COUNTY OF WELD, STATE OF COLORADO, LYING 2.50 FEET ON EACH SIDE OF THE FOLLOWING DESCRIBED CENTERLINE:

BEGINNING AT POINT "A" AS DESCRIBED ABOVE; THENCE S64°40'33"E, 9.73 FEET; THENCE N55°58'05"E, 7.12 FEET; THENCE S34°01'55"E, 28.24 FEET; THENCE S24°25'56"E, 6.80 FEET TO A POINT HEREINAFTER REFERRED TO AS POINT "C" AND THE END OF SAID STRIP OF LAND.

10' ACCESS EASEMENT

BEING A STRIP OF LAND 10.00 FEET IN WIDTH LYING WITHIN A PORTION OF TRACT 15, VISTA RIDGE MASTER FINAL PLAT RECORDED NOVEMBER 28, 2001 AT RECEPTION NO. 2903870, TOWN OF ERIE, COUNTY OF WELD, STATE OF COLORADO, LYING 5.00 FEET ON EACH SIDE OF THE FOLLOWING DESCRIBED CENTERLINE:

BEGINNING AT POINT "C" AS DESCRIBED ABOVE; THENCE S24°25'56"E, 18.11 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE SOUTHWESTERLY HAVING A RADIUS OF 30.00 FEET; THENCE SOUTHEASTERLY AND SOUTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 99°37'23", AN ARC LENGTH OF 52.16 FEET; THENCE S75°11'26"W, 40.65 FEET; THENCE S65°35'21"W, 32.03 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE SOUTHEASTERLY HAVING A RADIUS OF 193.00 FEET; THENCE SOUTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL OF 104°29'55", AN ARC LENGTH OF 351.83 FEET; THENCE S38°51'35"E, 78.42 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE SOUTHWESTERLY HAVING A RADIUS OF 38.00 FEET; THENCE SOUTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL OF 85°18'43", AN ARC LENGTH OF 56.58 FEET; THENCE S46°27'08"W, 17.76 FEET; THENCE S55°49'02"W, 29.02 FEET TO THE RIGHT-OF-WAY OF VISTA PARKWAY AND THE END OF SAID STRIP OF LAND.

EXCEPT ANY PORTION LYING WITHIN THE RIGHT-OF-WAY OF VISTA PARKWAY.

UTILITY EASEMENT

BEING A STRIP OF LAND 5.00 FEET IN WIDTH LYING WITHIN A PORTION OF TRACT 15, VISTA RIDGE MASTER FINAL PLAT RECORDED NOVEMBER 28, 2001 AT RECEPTION NO. 2903870, TOWN OF ERIE, COUNTY OF WELD, STATE OF COLORADO, LYING 2.50 FEET ON EACH SIDE OF THE FOLLOWING DESCRIBED CENTERLINE:

BEGINNING AT POINT "B" AS DESCRIBED ABOVE; THENCE N25°23'05"E, 66.80 FEET; THENCE N62°10'09"W, 152.35 FEET TO THE END OF SAID STRIP OF LAND.

SIDELINES OF SAID STRIPS OF LAND ARE TO BE LENGTHENED AND/OR SHORTENED TO PREVENT GAPS AND/OR OVERLAPS.

Certificate of Survey

THIS IS A CERTIFICATE OF SURVEY FOR THE TOPOGRAPHIC MAP AND IMPROVEMENTS SHOWN HEREON, PREPARED BY JESUS A. LUGO, JR., SURVEYOR, AND I, THE SURVEYOR, CERTIFY THAT THE SAME ARE CORRECT TO THE BEST OF MY KNOWLEDGE AND BELIEF.

THIS SURVEY DOES NOT CONSTITUTE A BOUNDARY SURVEY OF THE LESSOR'S PROPERTY.
REFERENCE IS MADE TO A POLICY OF TITLE INSURANCE, NUMBER 18943646, ISSUED BY FIDELITY NATIONAL TITLE INSURANCE COMPANY, AND HAVING AN EFFECTIVE DATE OF JULY 21, 2014. THIS SURVEYOR HAS MADE NO INVESTIGATION OR INDEPENDENT SEARCH FOR EASEMENTS OF RECORD, ENCUMBRANCES, RESTRICTIVE COVENANTS, OWNERSHIP TITLE EVIDENCE, OR ANY OTHER FACTS THAT AN ACCURATE AND CURRENT TITLE SEARCH MAY DISCLOSE. THE LESSOR'S LEGAL DESCRIPTION AND RECORD BOUNDARY ARE SHOWN HEREON FOR REFERENCE ONLY.
THIS SURVEY DOES NOT CONSTITUTE A BOUNDARY SURVEY OF THE LESSOR'S PROPERTY.

Diagram illustrating the elevation view of a four-post antenna tower structure. The tower consists of four vertical posts connected by horizontal cross-arms. The following components and dimensions are labeled:

- RR4 FOR 60W 100**: Label for the top equipment on the first post from the left.
- RR4 FOR 60W 250**: Label for the top equipment on the second post from the left.
- RR4 FOR 30W AWS**: Label for the top equipment on the third post from the left.
- RR4 FOR 60W PCS**: Label for the top equipment on the fourth post from the left.
- Horizontal Spacing**: The distance between the centers of the four posts is marked as **3'-0"** for the first three intervals.
- Antenna Labels**:
 - T.O. ANTENNAS 37'-4"**: Label for the top antenna on the fourth post.
 - T.O. RRH 36'-4"**: Label for the top RRH on the fourth post.
- Verizon Antennas**: A label pointing to two additional antennas on the fourth post, with the note **(4) 6'-0" VERIZON WIRELESS ANTENNAS PER SECTOR**.
- UNISTRUT BRACING**: Label for the diagonal bracing on the fourth post.

The diagram illustrates the proposed equipment layout for the new building, showing three views of the equipment racks.

- Top View:** Shows four Charles "Cube" Cabinets, Model #S84B223MN2, arranged in a row. Labels include:
 - CHARLES "CUBE" CABINET, MODEL #S84B223MN2
 - CHARLES "CUBE" CABINET, MODEL #S84B223MN2
 - CHARLES "CUBE" CABINET, MODEL #S84B223MN2

Window glass will be frosted or tinted so the silhouette of the antennas cannot be seen behind them.

The windows will be designed to match the dimensions, trim and color of the windows in the existing clubhouse.

The construction drawings will have more details and materials specifications. Below are photos of existing facilities that have these types of window features.
