ARCHITECTURAL STANDARDS - LR ZONING SINGLE FAMILY	
DETACHED RESIDENTIAL (VILLAGES 1-5 & VILLAGE 8)	

The Standards presented here are intended to modify the following sections of the Unified Development Code:

1. Architectural Variety and Character - Section 10.6.7 E1.c

i. Design Standards

a. Architectural Variety

(A) No identical model plan elevation shall be repeated directly across any street from the same model plan and elevation. (B) No identical model plan elevation shall be repeated more than once within every 4 lots on the same side of any street.

(C) A minimum of 3 alternative elevations for each model plan shall be submitted to the Town for review.

- b. Architectural Character Section 10.6.7 E1.d
- Each single family detached model plan and elevation shall demonstrate the following design attributes:

i. Design Standards

(A) Each elevation shall include a minimum of two windows (or one window and one door) per floor.

(B) Each front and rear elevation shall include more than one wall plane. Articulation that adds shadow and visual interest is encouraged.

(C) A variety of roof forms should be used. Single unbroken roof pitches should be avoided, except where a single roof treatment is an essential element of the Architectural Style.

(D) The main roof should extend beyond the primary facade by a minimum of one foot.

(E) An elevation of the home that faces a street, park, trail corridor or open space area shall provide an "Enhanced Elevation". An "Enhanced Elevation" shall provide three or more of the following design enhancements listed in (1) through (5) below. Application of the design enhancement shall be applied in a manner that is consistent with the style of the home. Side and rear elevation design enhancements shall be consistent with the design elements of the front elevations. (1) The addition of one window unit.

(2) A change in wall plane by providing one or more of the following options:

- An additional wall plane change. Minimum six feet in width and one foot projection.

- A projecting or cantilevered living space.
- A bay or boxed window. (3) A covered porch or deck.

(4) The addition of architectural detail elements such as: shutters, eave brackets, exposed rafter tails, corbels, lintels, trellises, columns or pilasters.

(5) The use of a minimum of two exterior cladding materials that can include materials such as masonry (cultured stone, stone, brick, stucco, or tile), lap siding, shingles, board and batten, or other decorative siding treatment.

(F) Columns or posts extending more than 36 inches above the ground which support structural elements such as porches, decks, or roofs should appear to be of adequate mass to support the structure above. (No exposed 4"x4" posts shall be allowed more than 36 inches above the ground). Columns supporting upper story decks should be 8"x8" minimum finished.

ii. Materials

(A) All exterior materials shall be of high quality, used in applications and treated appropriately to provide an attractive and long lasting appearance.

(B) When masonry cladding is used it shall be be in locations where its mass is logical and appropriate. In instances where masonry wraps the exterior corner of the home the masonry should continue to a natural transition point such as an inside corner of a projecting wall, a column, a door or window or other logical point. In cases where no such feature exists near the corner, the masonry wrap shall extend at least six feet from the corner.

2. Orientation of Dwellings to the Street - Section 10.6.7 E2

Each residence shall have at least 1 primary pedestrian doorway for access to the dwelling unit facing and generally visible from the front lot line of the property and within 12 feet of the most forward plane of the ground level living space. On corner lots, the pedestrian doorway may face any adjacent street. Unless prohibited by terrain or other site constraints, the orientation of the homes shall repeat the predominant relationship of building to buildings and buildings to street along the same block or the facing block. An exception shall be made for alley-loaded single-family detached dwelling units that do not have street frontage but do front onto a park or landscaped common area. In such case where the dwelling unit does not have street frontage, 1 primary pedestrian doorway shall be oriented toward a common pedestrian walk that connects to a street.

3. Garages - Section 10.6.7 E3

These regulations for garages shall be applied to non-living space or storage areas within garages whether used for storage of automobiles or other items.

a. Diversity of Garage Orientation:

(A)Except for garages oriented to alleys, all single family homes shall provide garages that meet one of the requirements below, and, a variety in garage orientation by providing a minimum of 2 of the following garage orientations on any single block:

- (1) Recessed garages; where the primary garage door generally faces the front lot line and the garage is recessed a minimum of 2 feet behind the most forward plane of main floor living space or a front porch.
- (2) Projecting garages; where the primary garage door generally faces the front lot line and the garage projects no more than 15 feet from the front door.

(3) Side-loaded garages.

- (4) Garages recessed a minimum of 2 feet beneath a second floor living space.
 - b. Width/Facade Ratio
 - The width of a front loaded garage shall not exceed 65% of the width of the front elevation.
 - c. Three or More Car Garage Orientation
 - The third bay of of any three bay or more garage shall either:
 - i. Have a different orientation from the first two; or
 - ii. Shall be recessed behind the first two by at least two feet when having the same orientation; or
 - iii. Shall be tandem to the first two.

4. Front Stoop

For model plans with a front stoop; the front stoop shall include the platform and stairs that are generally in front of a door that can be covered or uncovered. The maximum width of a covered front stoop shall be three feet in width.

5. Front Porches - Section 10.6.7 E4

For model plans with a front porch; the front porch shall be a minimum size of fifty square feet.
